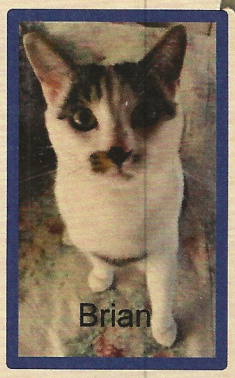
Snowflake ANIMAL RESCUE

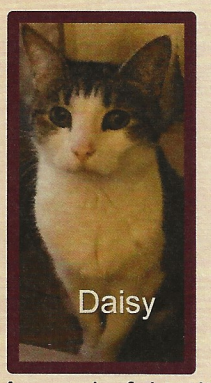
Greetings from Snowflake Animal Rescue! December 2025

We hope all is well as we close out another year.



Brian

We have had another busy year. We would like you to meet 2 very special cats that have captured many hearts. Brian was found stuck on a fence. Not sure how he landed in this predicament but it resulted in a severely broken hind leg. He underwent surgery and a long recuperation period, maintaining his sweet temperament throughout. Now he is a happy, playful sweet cat looking for his furever home.



Daisy

Daisy entered Snowflake Rescue 11 years ago as a 4 week old kitten with her mother and siblings. She was adopted but unfortunately was returned to Snowflake many years later. She has lymphoma but is comfortable in her foster home, sleeping at her foster mom's side and enjoying treats and all the snacks she desires. Even with her health concerns she still enjoys every day and life is pretty good. Daisy is one of our Snowflake Angels, which are animals that may not be adoptable for various reasons but will always have a home in Snowflake. If you would like to sponsor Daisy or one of our other sweet Angels; please find details at: https://snowflakerescue.org/sponsor-an-angel/

A wonderful trait of animals is that they make the most of every day. They know how to enjoy life in the present. That is a lesson that humans should adopt more often – enjoy the moment!

Vet bills are our largest expense. Your generosity helps us to continue to take care of our animals. Your support not only allows for basic medical care but the ability to treat animals with more serious conditions. And as always, we are focused on spaying and neutering as many as possible to help reduce the suffering of animal overpopulation. Please consider a donation to Snowflake Rescue this year. Your contributions through the years have made a difference in so many lives. We are so grateful for your continued support. We hope you are able to pause and enjoy a wonderful Holiday season!!
